### **HP Extreme the Most Awarded PWC Port**

HydroHoist Marine Group continues to receive accolades for its newest product – the HP Extreme. The product was awarded 2017 Top Product of the Year Award by *Boating Industry*.

“The HP Extreme is the easiest load and launch of any PWC docking platform on the market, with features unmatched by any in the boatlift industry,” said HydroHoist President and CEO Mick Webber.

In addition to the *Boating Industry* award, the HP Extreme also received the Innovation Award from Marine Recreation Association, based in California.

“It gives us great pleasure to accept these awards. We are delighted to be recognized throughout our industry, and are most proud to continue receiving testimonials and praise from customers across the country,” Webber said.

The HP Extreme has revolutionized the PWC port with its patented features including full roller-support of the PWC, ultra-tough polyethylene construction with Expanded Polystyrene (EPS) Foam, easily adjustable rollers to accommodate all models of water craft, and stainless steel roller axles compatible with all types of water conditions.

Additionally, the HP Extreme has an exclusive “air pillow” bow stop, flat anti-skid walking surfaces, and the easiest load and launch in the industry.
