The UltraLift™ Series Shallow Water Lift™ incorporates a longer tank with a lower profile to allow for operation in as little as three feet of water. Constructed of durable polyethylene, it is impact and puncture resistant.

Utilizing the same frame components as the UltraLift™, the Shallow Water Lift™ has been engineered to keep the galvanized steel components on the top side of the tank, minimizing corrosion and maximizing the life of your lift.

### STANDARD FEATURES

- Low profile molded polyethylene tanks
- All major steel components above the water*
- Grade 8 pivot hardware
- HydroGuard™ to protect your boat in the dock
- Made for applications in as little as 3 feet of water
- Two-piece stainless/polyethylene pitman bushings
- All cast parts are (HSLA) High-Strength Low Alloy steel making them 40 percent stronger than fabricated steel

*Exceptions may be necessary for proper installation.

### RECOMMENDED FOR:

- Boats up to 9,000 lbs and up to 28' in overall length
- Drive-in installation
- Floating docks with U-shaped slips
- Docks with lower roof clearance
